In 2011, the unit's sales in the U.S. amounted to 85,643 vehicles (a drop from 2010 - 0.22%). Lincoln Motor Company was founded in 1917 in Detroit by Henry Leland, who previously founded Cadillac for the production of aircraft engines. The company was named after Abraham Lincoln, the 16th President of the United States, for whom Leland voted for himself in the first election. After the First World War Leland decided to organize the production of prestigious cars, but due to financial difficulties was forced to sell the company. The buyer in 1922 was Henry Ford, who made Lincoln a division of Ford. The first model of the brand was the Lincoln L-Series, produced since 1920. It had a V-shaped 8-cylinder engine, was similar to Cadillac cars and cost $5,000. In 1932, Lincoln KB began production of a 12-cylinder engine. The next model in 1936 was Lincoln Marshmallow, also with a V12 engine. In its first year of production, Lincoln car sales increased ninefold. On the basis of Marshmallow in 1940 was created an elongated model Lincoln Marshmallow Continental, produced until 1948 (with a break caused by the war), and in 1955 was released a new model, now simply called Lincoln Continental. Its value was about $10,000 and was comparable to the cost of a Rolls-Royce. Continental remained the flagship of the Ford Motor Company until 1981, when production of the Lincoln Town Car limousine began. After the company joined the Ford Motor Company and until the early 1970s, Lincoln cars were produced on the original platforms, the merger was only concerned However, the savings resulted in all Lincoln platforms merged with other models in the group. In 1998-2002, Lincoln was from Premier Automotive Group, after which it was removed from it in accordance with Ford's new marketing strategy. Lincoln was one of the first brands to start producing prestigious SUVs with the Lincoln Navigator in 1998. After the recession in the early 2000s, the line starts to be more active, and in 2004-2008 it is planned to bring 5 new models to the market. To shorten the production preparation period, it is used to combine with nodes and platforms developed by other Ford Motor Company branches. Lincoln has extensive experience in creating limousines for U.S. presidents. The first such car was in 1939 designed for the Franklin Roosevelt Lincoln V12 convertible, called the Sunlight Special. He remained in service until 1950, when he was replaced by Lincoln Cosmopolitan, called Bubble Top. It was used by Presidents Truman, Eisenhower, Kennedy and once Johnson. In 1961, a Lincoln Continental convertible was built for Kennedy, and it was in this car that he was fatally shot in Dallas on November 22, 1963. Lincoln was used by Richard Nixon in 1969, and in 1972 Ford, Carter, Reagan and Bush Sr. Lincoln 1989 remained the brand's last presidential car. In 1983, 1993, 2001 and 2004, limousines were delivered to the White House by Cadillac. The first Lincoln cars were introduced in 1917. Today Lincoln remains one of the most coveted American luxury brands and competitors of European manufacturers. The Lincoln LS was introduced for the 2000 model year as a mid-size luxury car to compete with the Cadillac Catera. Owners will find it easy to maintain these cars with a Lincoln LS repair guide that offers detailed instructions on how to replace and repair these desirable modern luxury sedans. The Lincoln LS was available with either an all-aluminum 3.0 liter V6 or a 3.9 liter V8. Both engines were derived from power plants used in Jaguar vehicles, also built by Ford during this time period. Maintaining these engines is not difficult for the average home mechanic using a repair guide. Spare parts are easy to find and not as expensive as those found in competing vehicles. Designers have focused on creating a European style when creating LS, while keeping the car looks like it belongs in line. The Lincoln LS was the first Lincoln to offer a manual transmission since 1951. The car and the magazine driver chose LS as the car of the year in 2000. Today, the LS remains a highly desirable car and boasts a great enthusiast following that appreciates European style without European reliability issues. Lincoln LS owners will find a repair guide a valuable tool for maintaining and maintaining these luxury vehicles. Most repairs can be done by a home mechanic, saving a ton of money. The braking systems are reliable and have common parts with other Ford models. Spare parts are affordable and easy to find. Electrical systems are less, and the detailed posting diagrams offered in these manuals help owners track down problems and make repairs easy. The last Lincoln LS was built in 2006, when Lincoln revised the entire range of cars. Among the most desirable for collectors today, the last few models in the upper range trim levels command the highest prices in the used car market. High-quality, well-maintained Lincoln LS cars are becoming increasingly rare. The Lincoln LS maintenance guide will give the do-it-yourself mechanic step-by-step instructions needed to keep these luxury cars on the road and at peak cost. Lincoln ls 2001 Service Repair GuideProduction Information: A Complete Guide to Repair Factory Service. No additional fees, no expiration dates. A guide to repairing the service, available for instant download on a tablet or smartphone. This professional guide covers all repair, maintenance and troubleshooting procedures. It is very detailed and contains hundreds of pages with detailed and diagrams. This is the same type of manual used by professional mechanics and technicians containing step-by-step instructions and very detailed blown-up diagrams and photos to show you how to do each job correctly. Can I print the page? Yes, you can print out page or the entire guide, its your choice. Can I use this Guide on multiple computers? Yes, this guide can be used on as many computers as possible.
