Stinger Detox is a brand I've heard a lot of over the years, but until that point had never considered using it because of its bad reputation. I decided to do the right review of Stinger detox to see what is true. My concern is that although this brand of detox drink has been around for a number of years, virtually nothing about the company formula, or any indication it works on the internet. They are generally quite elusive, despite the drink being sold in many places. So does Stinger detox work? This is a question that I'm going to answer clearly somewhat in this review, so you know if you can take a drug test using it or not. What is Stinger Detox? Stinger detox has been around for years. He's got a cool bottle, with a little steamed wasp on it. For starters, it's just an 8oz drink. Now I know the company claim it is strong because the products are the full name of The Stinger Detox 5x instant extra strength. But 5x power what? They don't make another product that one force, so it's a totally pointless multiplier. Back to the size of the bottle, in any other brand of THC detox drink I have ever known, small 8oz bottles are only recommended for small people, or very light oxysmokers. You need a large amount of toxin removal and nutrients replacing the liquid, so high quality brands are always 16oz in size. Now I'm not saying that Stinger has failed to create a super concentrated detox drink, but given the negative reviews on the internet, I think it's incredibly unlikely that it is. Stinger Detox Ingredients List detox Stinger also does not fill me with confidence: filtered water, fructose, natural and artificial flavors, a mixture of mineral sting cleansing, monohydrate creatine, vitamin B2, (riboflavin), citric acid, sodium benzoate, potassium sorbate, guar gum. Total carbohydrates, sugars 1.2 grams, minerals can vary slightly because of their natural source. Chloride 131 mg, 4%, magnesium 24.5 mg, 6%. All other minerals are usually found in seawater zlt,1% of each of its main ingredients, as you can see, are water, fruit sugar and flavors. None of the other ingredients have anything to do with detoxification. The only thing that can detox you is the elusive stinger mineral cleansing mixture and what the hell is that anyone guess. I think it can't be anything more than a few substances thrown together to give the illusion of a secret ingredient. Also, I didn't even get a list of ingredients from the company's website. I had to take it from the review bottle I bought. In fact, there isn't even a page on the company's website, they're that elusive and impossible to learn anything about. Stinger Instructions in terms of Stinger Detox drink instructions, they are pretty simple. You drink an 8oz bottle of Stinger detox drink at a time. You Are You refill the bottle and drink water as well. You then have to urinate at least three times an hour after taking the drink to get rid of the toxins that Stinger you are taking from your body. After that you will be clear to pass the urine drug test for up to 5 hours. Another condition of using Stinger detox is that you should abstain from dairy products for two days before drinking the product, and do not add any more toxins to the body. The problem with these instructions is twofold: You usually don't get 48 hours notice for a drug test. I've never heard of another detox drink that tells you to abstain from dairy products. It feels to me a bit like getting out a reservation. Basically, if you don't when you complain, they will claim that you haven't followed all the instructions, which in my opinion is virtually impossible to follow in the first place unless you are vegan. Does Stinger Detox Work for Probation Drug Tests? No, Stinger Detox doesn't work for drug testing. In fact, it doesn't work for any type of drug test. I can say this with confidence for several reasons. First, my neighbor, with whom I regularly smoke, tried it some time ago. He didn't smoke for quite a while when he tried it. He followed all the instructions for using Stinger, and he tested positive for THC metabolites. Second, Stinger Detox reviews online are pretty poor. Yes, you get the routine It's awesome. Garbage on Amazon, which obviously paid fake reviews. But overall, the real user experience seems to be incredibly poor. Where to buy Stinger Detox..... Or not! I really can't recommend you even consider where to buy a Stinger detox. You can buy Stinger at Walmart. Detox drinks at Walmart are all useless, every review I've ever done recommends not buying detox brands available at Walmart. It's a cheap buy, which means it doesn't work. The quality of detox drinks costs money. On top of that, it's cheap to buy on Walmart, Amazon and eBay. Again, it tells you everything you need to know. The company just trade it anywhere they can at a low price to try to make money with high turnover. Stinger Detox Review: Conclusion High quality alternatives that really work saying all this, it's important to tell you that some detox drinks really work. But only a handful of brands have ingredients that can really help get rid of toxins from your system, and replace lost nutrients, so your sample seems normal. These brands aren't cheap, but they do work. I did reviews of all of them and used them myself in a live testing environment. Three brands of detox drink I always recommend are: Rescue Cleanse Mega Clean Ultra Elimex They Don't Start in price from about \$50-\$69. However you can get them cheaper with discounts on various sites. Rescue cleansing is performed by the same company that produces synthetic urine Oral Clear and Sub Solution. It tells you everything you need to know. It is a high-quality product, from a reputable authoritative Mega Clean is also a well-established brand of detox drinks. If you can get it with six free pre-get rid of pills, then you will really stand the best chance of passing a urine drug test. You take the pills the day before you drink Mega Clean and they will help get rid of toxins faster. You can order Mega Clean with pre-get rid of the tablets from this site. Ultra Elimex is a new detox drink. It's the most expensive brand out there, but it's also incredibly high quality. I reviewed it, tried it and so other people and it really works. You can get it for \$65, its for sale now. None of these recommended detox drinks require you to do something stupid like not eating dairy products for two days before drinking them. You can literally say that you are going for a drug test for two hours, drink a drink, and make sure you are going to take a drug test. August 12, 2016 By Stoner Stuff Facebook Twitter Pinterest Stinger drink aka Stinger Detox is today in the spotlight. Will it help you take a urine test? Well get to that, but first our friend recently came across a singer drinking on Amazon. And she decided to check it out. One of the things we dig the most is teaching people how to take a drug test for marijuana and testing and reviewing products that help, like detoxifying drinks and stuff. Check out our latest on detox stuff. Why? Because if these products work as they claim, then they will most likely keep someone from losing their job or worse than their freedom. Things like masons. As you'll read below, we recommend using synthetic urine to pass a drug test, Sub-Solution (with its warming powder) is definitely our favorite. But if you're interested in learning more about Stinger detox drink, please read on, dude. You can score a bottle of Stinger Detox on Amazon for about 12 bucks. And exactly half the people on Amazon who submitted the Stinger detox review thought it worked great. When our buddy drank a drink to Stinger and then tested herself with a homemade drug test she passed. So does Stinger's detox work to beat the urine test? We'd say yes. Since if your a pinch and need to pass a urine test immediately and can find a Stinger Detox in a store near you, then go ahead and grab it. This will most likely work as long as you follow the instructions on the bottle. PRO TIP-Evaluate drug test for grain and test yourself before a big test to make sure you pass using Stinger Detox. According to the manufacturer Stinger 7 Day Detox removes all toxins from the body allowing people not only to undergo a urine drug test, but also a terrible saliva drug test and blood tests as well. (Check this post if looking for information on how to take a hair drug test.) Most detox drinks for THC do not completely cleanse the body of toxins. They work like a fact-acting flush giving you clean urine for hours. That's enough to take a urine test for drugs. However Stinger Detox works differently. This will completely rid your body of toxins when used properly, using, it takes a full seven days to do it, so keep that in mind. Stinger Total Detox Weed, cocaine, nicotine, alcohol and methamphetamines leave traces of toxins in hair, blood, urine and fat cells. The Stinger drink speeds up your body's ability to remove these traces of toxins, but you should follow the instructions closely to make sure it works. We read a lot of Stinger Detox review that said it didn't work. But we suspect that people didn't follow the instructions exactly. Because our girl passed a urine test using it, so we're very convinced. Stinger drink instructions If you want to drink Stinger to work you have to first stop taking any drugs, at least two days before the start of Stinger 7 day general detox program, maybe they should call it Stinger 9 day general detox program instead? Anyway this includes no more use of use, of course, but also prescription drugs and over-the-counter drugs as well. Now take one tablespoon of Stinger Detox in the morning and one in the evening before eating. You can take it with food to help eliminate the nervous feeling associated with caffeine or indigestion. Also, you want to and avoid fatty foods such as cheese as well. Sorry dude, no nachos and pizza for you. Then just make sure to repeat these steps over the next seven days and drink the rest of the Stinger drink left in the bottle on the last day. If you follow these simple steps, taking a Stinger drink your body will be completely and forever free of toxins while you engage again. Stinger Mouthwash There's another product made by the same company that should help Stoners pass a drug test in a mouth swab. You guessed it, Stinger Rotwash, of course. They say to eliminate traces of toxins in the saliva in about 30 minutes. Stinger mouthwash is also non-alcoholic. We haven't tested it, so we don't know how well Stinger's mouthwash works. So if you tried a Stinger mouthwash to beat a saliva drug test, please let us know how it performed in the comments section below. We can recommend a clear choice of saliva neutralizing the gum, however. We have direct confirmation from two friends as well as some comments on our website that indicate his work. Expensive as a fuck, but it works. Speaking of things that work, let's talk about synthetic urine very quickly because it is definitely the easiest and most sure way to pass a urine test. The best way to take a drug test is we always recommend using synthetic urine to take a urine drug test. This is the best way to get through because it consistently works. You might think synthetic urine, or fake urine, fake urine, fake urine all you want to call is gross. But pure that's what's disgusting. Fake urine, not much. It's a toxin free and no matter how much asparagus you have it will never smell. Anyway, this is what the drug test labs use to calibrate their equipment so you know it works. If you are worried about synthetic urine being detected as synthetic, it will not happen if you buy a quality product like Sub-Solution. It's undetectable. We Are We it's themselves many times. It's a bad ass because it comes with heating powder to warm it up in seconds and 200% guarantee back money! Anyway good luck on your test, man. Have you tried Stingers drinking to take a urine test? How about rinsing Stinger's mouth? Leave us your stinger detox review in the comments section below... Facebook Twitter Pinterest Pinterest does stinger detox work for probation drug test
